Curtain Systems

Providing natural light and ventilation.

Curtains are a hassle free way of providing natural light and proper ventilation to your structure. There are several varieties to choose from including Roll-Over, Centre Roll, Cable Down, Split, Roll-Up and Parlour systems. The benefits of a curtain system are:

- Systems are designed for all climates and weather.
- Low maintenance.
- A variety of curtain material types and weights are available.
- Manual or electrical operation.
- Temperature controllers available for fully automated systems.
- Corrosion resistant hardware.
- Easy installation.
- A variety of wind support systems are available.
- Opening height of 2ft to 24ft.
- Available for any type of structure, steel/wood.
