Altra-Wall Insulated Panel

Providing natural light and ventilation.

Altra-Wall is a lightweight, continuous rigid panel with an R12 insulation value which slides over sidewall openings on livestock housing. The outer sleeve is a polyethylene weave and the core is 2-1/2" of high density styrofoam.

Each system can be operated by electronic thermostats, actuators or manually by a hand winch. Altra-Wall is suitable for all types of livestock and can be custom designed to your individual specifications.

- R12 Insulation value.
- Continuous length up to 200'.
- Custom sizing.
- Low maintenance.
- Suitable for all livestock.
- Automated or manual operation.
- 15 year warranty.
- Reduces power consumption.
- Year-round ventilation.
- Operates in the event of a power failure.
