

# SUN-NORTH SYSTEMS LTD.

*The Natural Ventilation Experts*

## ***Insulated Curtain Systems*** *Providing natural light and ventilation.*

**If you wish to have the best thermal curtain on the market, you should look at our 10 layer insulated curtain.**

Our insulated curtain consists of:

- An exterior layer of U.V. stabilized, non-breathable polyethylene weave material to the weather side.
- 8 inner layers of thermal non-woven polyester fabric.
- An outer layer of U.V. stabilized, non-breathable polyethylene weave material to the barn side.
- All 10 layers are resistant to the harsh chemical environment found in farm buildings.
- These layers will not absorb moisture and are mildew and rot resistant.
- Several standard heights and custom lengths are available.
- Extra horizontal hems can be requested for additional weight and easier folding.
