Insulated Curtains
*Custom sizes and
continuous lengths available*

Finally the ultimate curtain is now available
The All New 10 Layer Insulated Curtain
by Sun-North Systems Ltd.

If you wish to have the best thermal curtain on the market, you should look at our new 10 layer insulated curtain.

Our insulated curtain consists of:

An exterior layer of U.V. stabilized, non-breathable polyethylene weave material to the weatherside.

8 inner layers of thermal non-woven polyester fabric.

An outer layer of U.V. stabilized, non-breathable polyethylene weave material to the barnside.

All 10 layers are resistant to the harsh chemical environment found in farm buildings.

These layers will not absorb moisture and are mildew and rot resistant.

Several standard heights and custom lengths are available.

Call for more information and the location of a dealer in your area.
