PANEL

The new & improved Nova-Lite XL is double the thickness & double the R-value
of our original Nova-Lite Panels at no extra cost!

Double the Thickness, Double the R-Value, Double the Visibility

www.sunnorth.com

The Nova-Lite XL Panel

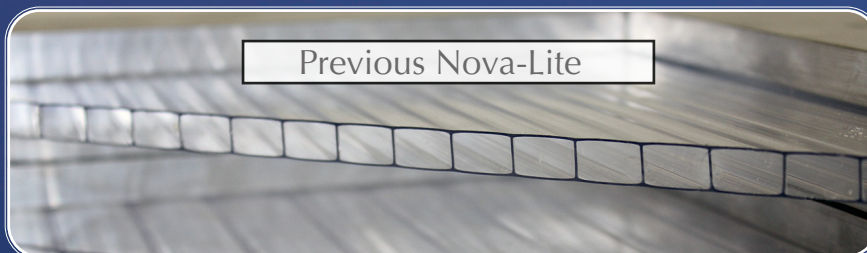

Sun-North Systems Ltd. manufactures and installs Nova-Lite XL sliding polycarbonate panels in a wide range of sizes. The panels are virtually unbreakable and have immense light penetration. Nova-Lite XL offers an R3 insulation value and an all aluminum heavy duty window frame assembly. Our clients find it the best panels for their milking parlours and equine areas.

The multi-walled construction of the Nova-Lite XL panels offer high thermal resistance, giving excellent thermal insulating values while blocking UV transmission.

- NEW! Five Wall Structure 5/8" thickness (previously 5/16" thickness)
- NEW! R3 insulation value (previously R1.75)
- Continuous sidewall windows made to fit any length.
- 12" to 6' in height.
- Minimum maintenance.
- Stainless steel cable, pulleys with bearings and heavy duty galvanized brackets to ensure long life.
- Perimeter gasket system and adjustable brackets to ensure a good seal between panel & structure.

Panel Cross-Section Comparison

** We still have Nova-Lite Vu available with acrylic glazing. Nova-Lite Vu offers many of the same features with the added benefit of being completely transparent.
